Regular Expression Specialist

Job Type: On-Demand/Part-Time Contractor
Location: Midtown Atlanta
Reports to: Director of Product

Company Overview

First Performance develops the next generation of financial card controls and digital engagement, using the latest technologies like AI, machine learning, geolocation, and more. Our API platform enables financial institutions to empower their cardholders to use, manage, and control their finances digitally. We're a global company headquartered in Midtown Atlanta's hub of technology and innovation.

Everyone at First Performance brings purpose and passion to work every day. Our teams are small, dedicated and collaborative. Individuals are given ownership and accountability for their work. Our company is not just about technology, it's about people. We help employees to build great careers and live great lives. Our goals are about achieving success for our customers and for our company. If you love to invent, have an entrepreneurial spirit, and strive for operational excellence, we want you on our team!

Position Description

The Regular Expression Specialist's primary objective is to help First Performance quickly scale our data-driven financial services to meet customer challenges and volume. You will create and iterate on efficient regular expressions to apply to large datasets. You will be at the forefront of the company as we deploy with new clients and expand our existing product services. This position requires the ability to be an independent, critical thinker and to work flexibly.

Essential Duties and Responsibilities

– Create and iterate on efficient regular expressions through identification of patterns and high priority items
– Coordinate regular expression delivery with engineering team
– Manage existing regular expression pool, updating and modifying as necessary
– Communicate and collaborate across all levels of the company to effectively deliver results

Qualifications

– Bachelor's degree or equivalent experience in computer programming/information systems or related field
– Experience building regular expressions in fast-paced environment
– Agile experience is preferred, but not strictly required
– Self driven, the ability to create repeatable processes and structure
– Superior project management skills, ability to work on tight timelines
– Understanding of software design, development, OOP principles and APIs
– You should understand this: ^[\d]+[\s]{1,3}.+?(?: |$)

Compensation

- Very competitive hourly rate
